Compact 650 D

Shrink tunnel with double ring nozzle heating system.

The Compact 650 D from Kalfass is the perfect shrink tunnel for production speeds in the range of 50 to 150 packs/minute. The unique ring-nozzle heating system is installed twice and its intelligent technology is energy efficient. The heat gets there where exactly it is needed. This ensures a perfect shrinkage process and low energy use, helping to save natural resources.

The figure may show optional equipment, ordered separately

Technical specifications

	Compact 650 DD
Adjustable working height	800 - 900 mm
Tunnel clearance width, height	650 mm, 200 / 400 mm
Length of the heated tunnel hood	1900 mm
Power supply	208 - 480 Volt
Continuously adjustable temperature	up to 190° C
Transport speed	10 - 35 m/min
Installed heating capacity	2 x 9 KW

The ring nozzle heating system provide uniform heat transfer into the shrink film.

An overview of the benefits

- Perfect allrounder for PE- and PO-films
- Maintenance-free plastic mesh-belt
- Perfect packaging results using constantly uniform heat energy transfer into the shrink film, regardless of the position on the conveyor belt
- Ring nozzle heating technology with integrated air circulation system for efficient energy recovery
- High level of insulation and compact design ensure fast warm-up times
- Easy adjustment of basic parameters (temperature, air volume and package speed) using continuously adjustable controller
- Intelligent technology ensures constant temperature during operation. Energy-intensive temperature fluctuations are prevented
- Easy to maintain due to carefully selected components

Solution with Kalfass quality. Competence in the production of a wide range of products, from individual units to packaging systems to integration into production lines.

KALLFASS is certified to ISO 9001:2008
