## COMPACT 650 SD and COMPACT 950 SD

### The compact shrink tunnel for small to medium formats.

The twin-execution Kallfass ring-nozzle heating system, inside the compact 1200 mm long hood, gets the heat where it is needed. This ensures a perfect shrinkage process and low energy use, helping to save natural resources.

The figure may show optional equipment, ordered seperately.

### Technical specifications

		Compact 650 SD	Compact 950 SD
Adjustable working height	[mm]	800 - 900	800 - 900
Tunnel clearance width	[mm]	650	950
Tunnel clearance height fix, optional	[mm]	300, more on request	400, more on request
Lenght of the heated tunnel hood	[mm]	1200	1200
Power supply	[Volt]	208 - 480	208 - 480
Infinitely adjustable temperature	[°C]	bis 190	bis 190
Transport speed	[m/min]	5 - 17,5	5 - 17,5
Installed heating capacity	[kW]	13,5	22,5

The ring nozzle heating system provides constantly uniform heat energy transfer into the shrink film.

### Your benefits highlighted

- Perfect allrounder for PE- and PO-films
- Maintenance-free plastic mesh-belt
- Perfect packaging results using constantly uniform heat transfer into the shrink film, regardless of the position on the conveyor belt
- Ring nozzle heating technology with integrated air circulating system for efficient energy recovery
- High level of insulation and compact design ensure quick warm-up times
- Easy adjustment of basic parameters (temperature, air volume and package speed) using continuously adjustable controller
- Intelligent technology ensures constant temperature during operation. Energy-intensive temperature fluctuations are prevented
- Easy to maintain due to carefully selected components

**Solution in Kallfass quality. Competence in the production of a wide range of products, from individual units to packaging systems to integration into production lines.**

KALLFASS is certified according to ISO 9001:2008
