

ENERGY-SAVING SHRINK TUNNEL COMPACT 650 S

Intelligent technology for energy-efficient shrinking

Complete product range for efficient packaging processes

COMPACT 650 S

The compact shrink tunnel for small to medium formats. With the extra advantage of heat performance.

Transport speed Installed heating capacity

The Compact 650 S is ready to go in an instant. It takes just three minutes to heat up. The unique ring-nozzle heating system is installed once and its intelligent technology is energy efficient.

The figure may show optional equipment, ordered separately

lechnical specifications	Compact 650 S
Adjustable working height	800 - 900 mm
Tunnel clearance width, height	650 mm, 200 / 400 mm
Lenght of the heated tunnel hood	1200 mm
Power supply	208 - 480 Volt
Continuously adjustable temperature	up to 190°C

5 - 17,5 Meter / Minute

13,5 kW

The ring nozzle heating system provide uniform heat transfer into the shrink film.

Your benefits highlighted

- Perfect allrounder for PE- and PO-films
- Maintenance-free plastic mesh-belt
- Perfect packaging results using constantly uniform heat energy transfer into the shrink film, regardless of the position on the conveyor belt
- Ring nozzle heating technology with integrated air circulating system for efficient energy recovery
- High level of insulation and compact design ensure fast warm-up times
- Easy adjustment of basic parameters (temperature, air volume and package speed) using continuously adjustable controller
- Intelligent technology ensures constant temperature during operation. Energy-intensive temperature fluctuations are prevented
- Easy to maintain due to carefully selected components

Solution with Kallfass quality. Competence in the production of a wide range of products, from individual units to packaging systems to integration into productions lines.
