Fully automatic, continuous motion side sealer

Universa 800 Servo - for large products or multi packs

The Universa 800 Servo is a hybrid that closes the gap between intermittent motion and continuous motion side sealers. It is the first time that a single machine can offer combined advantages from both machine types. Perfect packaging results for highest requirements. High impact retail packaging for industrial products and high value products in large format.

The figure may show optional equipment, ordered separately

Technical specifications

	Universa 800 Servo
Transverse seal bar, length	850 mm
